Transceivers: TEN TEC Omni C

Antennas: Wilson Sy 33 w 40M & a Doublet

Linear: Dentron GLA 1000B

We arrived at Kingman 4-15-81 after 930 miles of sailing. The TEN TEC's performed perfectly through salt spray, heat and wind up to 60 knots. After 12600 QSO's we left on 4-23 and pulled into Palmyra for sail repairs on 4-23 from a rough gale. We left Palmyra on 4-29 after 5400 QSO's and arrived as Pago Pago on 5-11. 2400 miles on BANYANDAH.

Operators ADØS George
W6HTH Bill
KB7NW Jack

A big thank-you to the TEN TEC Company for making the whole expedition possible and for the excellent performance from the rigs.

Thanks to all who worked us for your patience, to KB7KQ for many volunteer hours getting us going, to our wives for allowing such an adventure, and to all whose praise kept us going on a long, difficult trip.

All QSL's verified by ADØS, Box 43, Merrifield, MN 56465
Cards by The Paul Bunyan Wireless Assn.
